

Creating Safe Connections:

Towards equity-informed preventative care

- **FREE** e-learning course
- **Co-designed** with people with lived and living experience of lung cancer risk or smoking cessation
- **CME accredited for 4 professional development hours**
- Builds skills and competencies in **primary care providers** on how to integrate equity-oriented, **trauma- and violence-informed care (TViC)** strategies into screening conversations.
- Uses lung cancer screening as a case example
- Includes 4 chapters with videos, case-based activities, quizzes, a downloadable Notebook, and additional resources.
- Supports organizations and practices in developing policies and protocols for TViC integration, benefiting patients, providers, and healthcare settings.
